Facilitator's Short Biography

Zélie Marçais is a development economist specializing in geospatial data analysis for environmental monitoring. She has experience working at the EBRD, where she played a key role in the Impact Assessment of the Green Cities Program. Zélie holds an MSc in International Development from Sciences Po Paris and the London School of Economics, and a Bachelor's Degree from Sciences Po Paris and the University of California Berkeley.

Dominik Naeher is a Development Economist with research interests spanning Microeconomics, International Economics, and the Economics of Information. Before joining University of Göttingen in 2021 as a Research Fellow, he worked as Assistant Professor at University College Dublin. He earned his PhD in Economics from Goethe University Frankfurt in 2018. His recent work covers areas such as technology adoption, market regulation, agricultural productivity, political economy, regional integration, and policy evaluation, with a particular focus on examining how information frictions influence economic decisions and development outcomes. Dominik Naeher has taught at universities in Germany, France, Ireland, China, Korea, and South Africa. He also regularly shares his expertise by providing policy advice to international organizations and NGOs, including the World Bank, European Bank for Reconstruction and Development, Asian Development Bank, and African Center for Economic Transformation.

Raghavan Narayanan is an Associate Director at the European Bank for Reconstruction and Development based in London. He has more than 25 years of experience in working in emerging markets and across various financial institutions as a Banker and Economist. Raghavan is a seasoned instructor on private sector development issues at the IPDET and EES conferences for more than a decade. He also has expertise in evaluation sciences and policy advice working with the energy industry in North America and Asia and has published with the Journal of Development Studies, Journal of International Economics and Economic Policy, and the Journal of Public Finance. He has been a chapter contributor to two books on Impact Investing and Data Envelopment Analysis in Banking.

Alexander Stepanov is an impact economist at the European Bank for Reconstruction and Development (EBRD), where he has been leading multiple impact assessment of EBRD operations. His current project, impact assessment of the EBRD Green Cities Programme, is closely related to the proposed workshop topic. Alexander has presented impact evaluations at multiple international events and published his research in various economic journals. He has proficient skills in geospatial analysis in R, Python, and QGIS.
